

NB-Lux™ Media Marketplace

Cloud-Based Custom Cell Media Configurator and Ordering Platform

NB-Lux™ Media Marketplace

Streamline and Manage All Your Cell Culture Media Needs

NB-Lux is a free online portal that facilitates customization, quoting, ordering, and tracking of cell culture media and other critical biological solutions. Simplify the configuration and ordering of cell culture media, buffers, balanced salt solutions, and our pre-optimized off-the-shelf media and reagents. Configuration options include components, concentrations, and packaging. Save and order your custom formulations, or purchase and modify basal media formulations from popular suppliers. NB-Lux is a one-stop-shop solution to support your cell culture needs.

Cloud-Based Media Marketplace

Free online platform built to facilitate easy customization and streamlined ordering of any product.

Customizable at Every Level

Easily customize components, testing, grade, and packaging of your media, buffer, or balanced salt solution.

Expedite Quoting and Ordering

Avoid the complex and time-consuming process of custom media requests. Simply input your media needs in NB-Lux and view estimated pricing and lead times.

Media Ownership

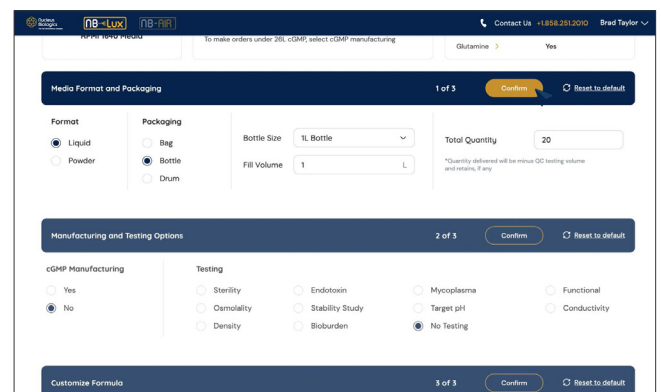

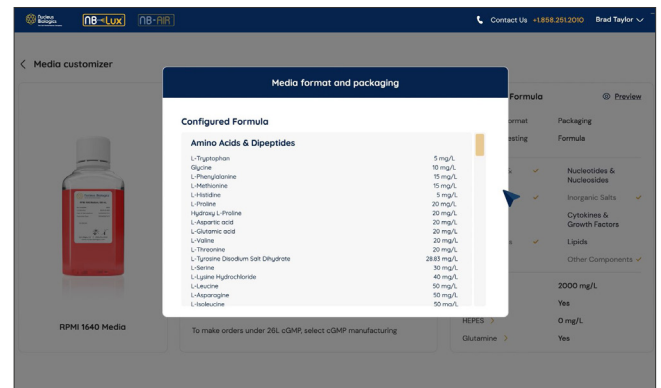

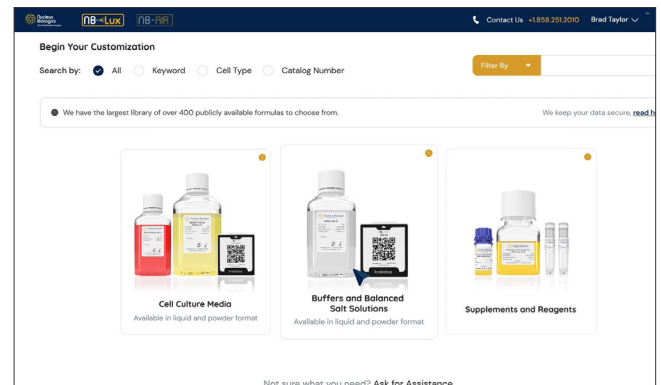

Know every component and concentration. Select grade, testing, and volume to match your stage of development. It's your IP!

Secure Formula Repository

Securely store your customized formulations on your account where you can also access COAs and other product information.

Streamlined Order Processing and Tracking

Instantaneously review and approve product specifications and keep track of your order status in real time.

One-Stop-Shop Cell Media Solution

Simplify Media Customization with NB-Lux™

The composition of your media, buffer, and balanced salt solution can have a profound effect on cell function and efficacy. By changing just one component in your solution, you can significantly enhance cell function. NB-Lux makes the customization of media products easy.

Begin With Any Solution

- Start from one of our available bases
- Select from a library of over 400 publicly available formulas
- Input your own custom media
- Build your media from the ground up

Customize Any Aspect of Your Solution

- Components and concentrations
- Format – liquid or powder media in Krakatoa™ pod
- Packaging – bags, bottles, drums
- Fill volume
- Lot size – 2L to 2,000L
- Manufacturing – GMP or research grade
- Testing
- Grade selection

NB-Lux simplifies the customization process of media, buffers, and balanced salt solution and facilitates the rapid creation of complete, ready-to-pipette media solutions. View estimated pricing and lead times and expedite the development of your program.

Full Transparency

Free your process from hidden media. Transparency is guaranteed – know every component and its concentration.

More Than a Media Configurator

NB-Lux is an online marketplace, a one-stop-shop for customization and ordering of solutions to support your cell culture media needs.

Purchase off-the-shelf cell culture media products, including:

Supplements and Reagents

- Physiologix™ Serum Replacement
- Vitronectin XF™ (ECM)

Specialized Media

- NB-ROC™ T Cell SF Medium

Customize Your Bag Configuration

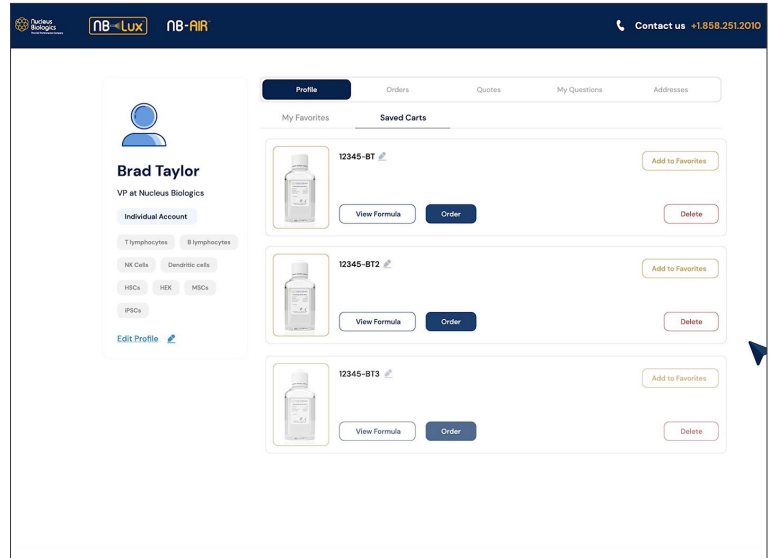

NB-Lux bag configurator gives the option to customize your bag the way your protocol demands. Choose size, fill volume, and ports per bag while also selecting tubing material, length, connectors and other fittings.

Comprehensive User Portal

Access all your cell culture activities and review important information related to your orders within the NB-Lux portal.

- View your Favorites or Saved Carts
- Access your Previous Orders and simply re-order
- View Order Details and product-related Documents from Previous and Pending Orders, such as COAs and Specification Sheets
- Review Quotes
- Access your media product Formulas
- Manage account details and access customer service reports

Robust Security Infrastructure

The safety of your data and formulations is our top priority. NB-Lux is built with a robust infrastructure to protect your proprietary information.
